**Additional Instructions:** \_\_\_\_\_

**Driver Info:**

Height: \_\_\_\_\_ Weight: \_\_\_\_\_ Seat Type: \_\_\_\_\_

**Step 3: Customize Your Chassis - Seat Bar Layout**

A is measured from the bottom of the lower frame rail to the top of the seat bar on the right side. B is measured from the rear of the motor plate to the front edge of the seat bar in the center of the car.

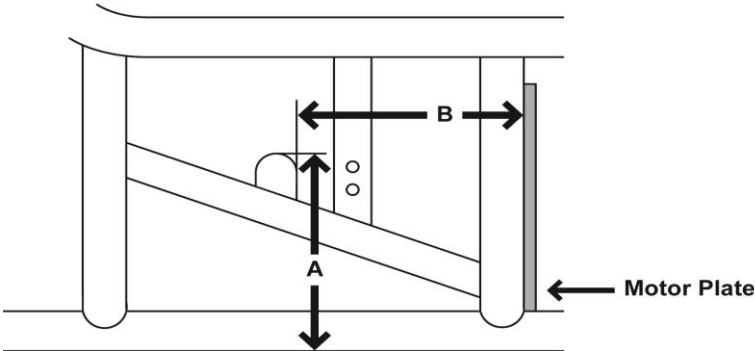

**RIGHT SIDE VIEW**

\_\_\_\_\_ Seat Bar Standard Dimensions

A = 11.5"  
B = 19.75"

\_\_\_\_\_ Seat Bar Custom Dimensions

A = \_\_\_\_\_  
B = \_\_\_\_\_

**Step 3.1: Customize Your Chassis - Cage A-Frame**

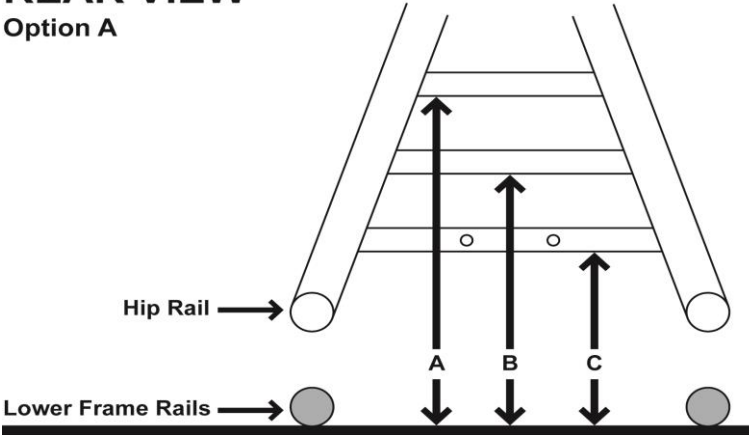

A, B, and C are measured from the bottom of the lower frame rail to the lower edge of each cross member. Use a straight edge across the bottom of the frame rails. Measure on the right side of the A-Frame. Raised rail cars will vary on the left side.

\_\_\_\_\_ Option A: A-Frame is mounted to the outside frame rails.

\_\_\_\_\_ Standard Dimensions  
A = 42"  
B = 34.75"  
C = 28.25"

\_\_\_\_\_ Custom Dimensions - Must Specify  
A = \_\_\_\_\_  
B = \_\_\_\_\_  
C = \_\_\_\_\_

**REAR VIEW**  
Option A

\_\_\_\_\_ Option B: A-Frame is mounted on the rear cross member, giving driver more room.

\_\_\_\_\_ Standard Dimensions  
A = 42"  
B = 34.75"  
C = 28.25"

\_\_\_\_\_ Custom Dimensions - Must Specify  
A = \_\_\_\_\_  
B = \_\_\_\_\_  
C = \_\_\_\_\_

**REAR VIEW**  
Option B
